Questionnaire to estimate the level (%) of the Safety of Users of Electricity in Dwellings in Countries

The Electrical Safety Barometer consists of 13 essential criteria. Each of these criteria has a weighting factor to enable the calculation of a general score for each country. Both FISUEL and world experts endorse these criteria and the weighting factors. With the assistance of local experts, we are applying the barometer in an increasing number of countries.

Explanation of the **13 major criteria** go to -->

<https://www.safetybarometer.org/criteria/>

Enter a number of the following criteria (1, 2, 3 or 4) in the yellow cells "column criteria"

- 4 = Fulfilled Criteria** : existing criteria in your country (score 100%)
- 3 = Partially fulfilled Criteria** : part of the criteria existing in your country (score 50%)
- 2 = Not met Criteria** : criteria known but unapplied (score 10%)
- 1 = Unknown Criteria** : criteria inexistent (score 0%)

Number of criteria	4 - Fulfilled	3 - Partially	2 - Unapplied	1 - Unknown		Level of Electrical Safety in Dwellings
	2	2	0	9		28%

Criteria	Question	Weight	Criteria	Score
Standards & rules	Are standards and rules in place?	10	3	5%
Comments : There are no standards specific to Niger, so we use the French standard NFC 15-100, but there are rules governing safety of dwellings electrical installations,				
Initial verification	Is an initial inspection required?	10	3	5%
Comments : Initial inspection is required but is not compulsory				
Periodic inspection	Is a periodic inspection required?	7,5	1	0%
Comments : There is a draft decree which has not yet been signed				
Inspection report	Must there be proof of the inspection by the delivery of an inspection report?	5	1	0%
Comments : The electricity company does not require a control report to connect an electrical installation to the electricity network				
Inspection for existing installations	Is there a mechanism for inspection of existing installations?	10	4	10%
Comments : There is a mechanism for inspection of existing installations				
Inspector	Must the person carrying out the inspection be a qualified inspector?	7,5	4	8%
These are technicians from the structure in charge of control				
Electrical contractor or installer	Must the electrical contractor or installer be a qualified person?	5	1	0%
Comments : The law does not require the installer to be qualified				
Role of utilities	Does the electric utility only connect the installation after having received a positive inspection report?	10	1	0%
Comments : The electrical company connects the installation to electric network as soon as the customer pays the bill				
Consumer education	Are consumers educated on the dangers of electricity?	5	1	0%
comments : They are not educated				
Regulation	Is regulation in place that imposes standards for electrical installations and initial verification?	5	1	0%
Labelling and certification	Are products in the market adequately labeled for electrical safety, and is this labeling system understood?	5	1	0%
Comments :				
Role of manufacturers	Do manufacturers actively engage for electrical safety in the marketplace?	5	1	0%
Comments :				
Market surveillance	Is there adequate action on market surveillance from the authorities?	15	1	0%
Comments : The is no adequate surveillance from the authorities
